

Digital Grain Moisture Meter

LGMM-A1 Series

Digital Grain Moisture Meter LGMM-A10:

Digital Grain moisture Meter LGMM-A10 is an advanced digital moisture measuring device with automatic moisture measurement of wide variety agriculture grains. It has most advanced revising mode and user friendly material type selection mode. Automatic temperature adjustment and moisture correction when no material is measured are important feature of this device. It works on AA batteries and consists of automatic power shut down feature. It is ideally used for moisture measurement in agricultural grains like wheat, soybean, beans sediment, coffee beans, rice, etc.

Features

- Automatic weighing of material
- Measuring element used is Grain
- Automatic temperature adjustment
- Auto power off after 3 minutes
- Power supplied by AA batteries
- Automatic moisture correction when no material is measured
- User selection for material kind and revise moisture error

Applications

Widely used for moisture measurement in agricultural material like rapeseed, wheat, barley, pea, sorghum, round paddy, peanuts, onion, clover, tea, beans, round rice, cocoa beans, sunflower, cottonseed, soybean, canola, brown rice, sesame, etc.

Specifications:

Model no	LGMM-A10
Measuring Element	Grain
Moisture Range	3 % to 35 %
Repeating Error	$\leq 0.2 \%$
Measuring Error	$\leq \pm 0.5 \%$
Measuring Time	≤ 10 seconds
Working Temperature	0 °C to 40 °C
Working Power	4 pcs \times 1.5 V AA batteries
Packing dimension (W \times D \times H)	320 \times 360 \times 170 mm
Weight	0.6 kg
