

Rapid Low Temperature Circulating Bath

LRTB-A31

Rapid Low Temperature Circulating Bath LRTB-A3I

Rapid Low Temperature Circulating Bath LRTB-A3I is a microcomputer controlled 7 L bath with cold ring liquid circulation and cryogenic liquid with a temperature range of -10 °C. Refrigeration unit with low temperature cooling pump facilitates consistent high pressure and maintenance of low temperature under working conditions of reaction experiments. Equipped with anti-corrosive circulatory system preventing traffic flow, high pressure and low pump body temperature.

Features

- ▶ Volume - 7 L
- ▶ Low temperature cooling pump
- ▶ Microcomputer controlled temperature
- ▶ Temperature and time LCD display
- ▶ Built-in liquid level monitor
- ▶ Refrigeration unit with relay , protector and capacitor
- ▶ Anti-corrosive circulatory system

Specifications

Model No	LRTB-A3I
Volume	7 L
Temperature range	- 10 °C
Refrigerating capacity	1365 W
Pump flow	20 L / min
Temperature stability	± 0.5 °C
Head of delivery	10 m
