## Rapid Low Temperature Circulating Bath LRTB-A33

Rapid Low Temperature Circulating Bath LRTB-A33 is a microcomputer controlled 7 L bath with cold ring liquid circulation and cryogenic liquid with a temperature range of  $-40\text{ }^{\circ}\text{C}$ . Refrigeration unit with low temperature cooling pump facilitates consistent high pressure and maintenance of low temperature under working conditions of reaction experiments. Equipped with anti-corrosive circulatory system preventing traffic flow, high pressure and low pump body temperature.

### Features

- Volume - 7 L
- Low temperature cooling pump
- Microcomputer controlled temperature
- Temperature and time LCD display
- Built-in liquid level monitor
- Refrigeration unit with relay, protector and capacitor
- Anti-corrosive circulatory system

### Specifications

Model No	LRTB-A33
Volume	7 L
Temperature range	$-40\text{ }^{\circ}\text{C}$
Refrigerating capacity	2052 W
Pump flow	20 L / min
Temperature stability	$\pm 0.5\text{ }^{\circ}\text{C}$
Head of delivery	10 m
