## TSST-A10

## Soil Salinity tester TSST-A10

Soil Salinity tester TSST-A10 with handheld design is suitable for accurate measurement of both soil temperature and soil salinity. Equipped with easy to use key buttons, user friendly controls, durable design, it is perfect for the field operations across agriculture, gardening, and construction industry.

### Features

- ◀◀ Automatic temperature compensation mode
- ◀◀ LCD touch display
- ◀◀ Large storage capacity
- ◀◀ Easy insertions in to the soil
- ◀◀ Automatic data recording
- ◀◀ Continuous measurement design

### Applications

Used to measure soil salinity of fertile, regular, dry soil etc. in agriculture, farming industry and across scientific research labs, geology.

### Specifications

Model no.	TSST-A10
Salinity Measurement range	0.00 to 19.99 ms/cm
Measuring accuracy	EC $\pm$ 2% full scale
Temperature Measurement range	-5 to 50 °C
Temperature accuracy	$\pm$ 0.5 °C
Temperature compensation	0 to 50 °C
Resolution	0.01 ms/cm
Memory storage	Stores 12000 groups data storage
Working temperature	0 to 50 °C
Gross weight	15 kg
Power	5 pcs AA batteries, power adapter
